INERT REPLICAS

3D PRINTED REPLICA MODELS

- These models represent a sample of 3D LifePrints **current catalogue offerings**
- The 3D printed models are **accurate** in terms of **size** and **shape**
- 3D LifePrints has the ability to create models from **3D scans** or **2D pictures**
- If you require a **mine or UXO that is not currently offered**, 3D LifePrints has the capability to **design and provide any 3D print of mines or UXO to meet your requirements**. These can include inner workings and cut-away designs
- Models can be printed in a wide variety of colours and materials including durable plastics and with metal content.
- Models are primarily hollow and can be filled with sand to reach the required weight

BOX SETS

- The cost of a rugged box to host the models, including foam inserts cost and information sheet is **\$400 USD**
- The number of models that can be inserted into a single box set depends on the types and quantities of models selected
- The final quotation will include the total cost of the number of box sets required to fulfill your order

DISTRIBUTION

- 3D printed models can be **provided to almost any location globally**
- For orders to certain locations, it may be necessary to obtain the relevant approval from the local country in order to print and ship in-country that can be defined through further discussions
